

# Teori arsitektur – Lecture week3

Eka Permanasari

Rahma Purisari

# THE USE OF TYPOLOGY

- Analyze and discuss the existing production
- To be used as tools in designing

# BERNARD TSCHUMI: SPACES AND EVENTS

- Architecture may start with program. Yet event that occurs in the space cannot be dissociated from architecture
- There is no fixed relationship between architectural form and the events that take place within it.
- In Tschumi's theory, architecture's role is not to express an extant social structure, but to function as a tool for questioning that structure and revising it.

# BERNARD TSCHUMI: SPACES AND EVENTS

- Spaces we see on magazine has transformed architecture as passive objects instead of place that confronts spaces and action.

# REM KOOLHAAS: DEFINITIVE INSTABILITY

- Mixed use
- Expect the unexpected in the space
- Through the medium of the Skyscraper, each site in the Metropolis accommodates in theory at least-an unstable and unforeseeable combination of superimposed and simultaneous activities whose configuration is fundamentally beyond the control of architect or planner.
